**Save Every Drop!**

Every drop dripping day and night.  
May mean someone living with thirst,  
Just fix it right or shut it tight,  
Because it's every drop that really counts.

You look at it is running, you brush your teeth,  
The water flowing, when soaping your feet  
Imagine of all the litres of water lost!!!  
Tuning off the tap, does it require cost?

You go with your bottle full to school,  
For your thirst and throat to cool,  
Just sipping a bit, the remainder you throw,  
That water could help a plant grow.

The earth cracks with blistering writhing,  
Rivers dry and the crops withering,  
If water is consumed without a thought,  
We all shall bear the brunt of drought.

As trees are fell without thought,  
Streams and wells are waned out,  
So, save water, and do your part,  
It's not a game, Let the water last!!!
